LIFE ON LAND

Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation, and halt biodiversity loss

For the benefit of nature and its development

Every year, the Kyiv Polytechnic's library, in cooperation with university units, carries out a planned collection of waste paper - printed materials that have lost their relevance, have no value or are physically worn out.

Since May 2025, 6,589 kilograms of waste paper have been collected. The collected recyclables were handed over for recycling to the Vtorresursy No. 3 LLC under the current contract .

Proceeds from the sales go to a special fund of Kyiv Polytechnic intended for the needs of the educational process and infrastructure development.

This initiative directly contributes to achieving the UN Sustainable Development Goals:

SDG 4: Quality education - updating library collections provides access to relevant, high-quality knowledge;

SDG 12: Responsible consumption and production - reuse of resources and reduction of waste;

SDG 13: Climate action - by reducing waste and conserving natural resources;

SDG 15: Life on land - by protecting, restoring and promoting the sustainable use of terrestrial ecosystems, and sustainable forest management.

Events to landscape the university campus, in particular:

maples, lindens and thujas donated by the National University of Life and Environmental Sciences of Ukraine (NULES) were planted in the Unconquered Park, together with NULES colleagues;

donated by university's partners, sakura trees were planted at the entrance to the KPI park near the Politekhnichnyi Instytut metro station,.

The Igor Sikorsky Kyiv Polytechnic Institute's Environmental Protection Policy **is in effect (approved in 2023).**
